

Tingtun Termer

Access dictionaries directly from a text. Works for PC, tablet and Smartphone and is accessible for all users.

Dictionaries can cover specific areas like health, energy, law, or general language translations.

Terminologies for more than 500 language combinations used in the European Parliament, and several general dictionaries.

For Authors

Your readers can get confused and diverted to other websites if they have to search the web for unfamiliar words. Make sure they find the right explanations and translations right there on your page.

Simple to install on any website for webpages and PDF documents.

For Readers

Quickly find translations or definitions from any online text. You can select from a range of dictionaries or create your own. Use Termer on your PC, tablet or Smartphone.

Simple to install in all common browsers.

TINGTUN

Tingtun Termer is designed to meet the European requirements, to protect personal data and to assure accessibility for people with disabilities.

Termer is used and supported by the Mobile Age project co funded under H2020, grant agreement No 693319, project website: www.mobile-age.eu
